

Dorothy Merritt, MD

Proving Lead Toxicity in a Primary Care Practice and Getting Insurance to Pay!

About the lecture:

This lecture will review the latest lead toxicity studies from the NIH normative aging publications and the latest NHANES publications from the CDC concerning lead blood levels and increased cardiovascular risks. We will also provide case studies of typical internal medicine patients who have lead toxicity and who benefit from Chelation. Finally, we will provide a history and physical documentation sheet that got us 100% medically necessary results with the Trailblazer Medicare Integrity unit, as well as other preauthorization tools for private insurance.

About Dr. Merritt:

Dorothy Merritt has been in practice 24 years and has been an ACAM member for over 12 years. She practices primary care Internal Medicine in Texas and integrates environmental and genetic medicine into her "personalized medical practice." Merritt has been giving pre-session lectures for ACAM for 3 years.
